

Xm Radio is without question the best thing to happen to radio in a very long tiime. I pay for quality in most cases commerical free radio not only in my car but in my home. I honestly only listen to regular radio for local traffic however that is now been addressed to my delight on XM. It would be a complete crime to allow NAB to infultrate such a great program and respectfull ask the FCC to promptly reject NAB's petition 04-160. XM provides all the quality programing I pay for and deserve. Thank you.
